**Paperbacked Veneer 4 x 8' Options**

Sequence Match

Select this option if you are ordering more than one sheet of veneer and want each sheet to reasonably match the other in terms of color and grain. The price for this option is \$ 7.90 per sheet. The lead time is not affected.

PSA Backing

This "peel and stick" adhesive by 3M™ is applied at the factory and allows you to instantly bond the veneer to a project surface. The price for this option is \$ 38.50 per sheet. This option adds 2 days to the lead time.

20 mil Backing

The standard paper backing is 10 mil thick. This is the ideal combination of quality and price for most uses. A 20 mil backing is most often used on horizontal surfaces with less than perfectly smooth substrates. The face veneer is the same thickness regardless of the backing size. The price of this option is \$ 11.20 per sheet. This option adds 2 days to the lead time.

Paperbacked Veneer 8' x 4' Options
<u>Sequence Match</u> Select this option if you are ordering more than one sheet of veneer and want each sheet to reasonably match the other in terms of color and grain. The price for this option is \$ 7.90 per sheet. The lead time is not affected by this option.
<u>20 mil Backing</u> The standard paper backing for 8' x 4' veneer is 20 mil thick.

### Reconstituted Veneer: 4' x 8' and 8' x 4'

A reconstituted veneer is a man-made product using a wood commonly called "obeche". These veneers are systematically dyed to mimic the look of their real wood counterparts and then applied to a paper backing. The beauty of this type of veneer is its outstanding color and grain consistency from sheet to sheet. Reconstituted wood veneers are defect-free and identical from one sheet to another when purchased together, making them a great option for projects where consistency is critical.

4' x 8' Species	10 mil	Lead Time
Cherry, Qtr	\$ 108.50	1 Day
Ebony, Qtr	\$ 93.50	1 Day
Maple, Qtr	\$ 102.50	1 Day

<u>PSA Backing</u> This "peel and stick" adhesive by 3M™ is applied at the factory and allows you to instantly bond the veneer to a project surface. The price for this option is \$ 38.50 per sheet. This option adds 2 days to the lead time.

## 2-Ply Veneer: 4' x 8'

Our 2-ply veneer has a wood-on-wood construction utilizing a thin acrylic membrane that provides the ultimate protection against bubbling, glue seepage, and telegraphing. A new adhesive technology used in this veneer creates no unsightly edge lines. The perpendicular face and backer construction allows our 2-ply veneer to bend over moderate curves in the long-grain direction and over tight curves in the cross-grain direction.

Species	2-Ply	Lead Time
Alder, Clear	\$ 94.90	3 Days

### 2-Ply Veneer 4' x 8' Options

#### Sequence Match

Select this option if you are ordering more than one sheet of veneer and want each sheet to reasonably match the other in terms of color and grain. The price for this option is \$ 7.90 per sheet. The lead time is not affected by this option.

#### Grain Selection

Cross Grain - The backer veneer is applied perpendicular to the face veneer grain. This option allows maximum rigidity and stability without risk of tearing. With this type, the glue line between the plies is more noticeable. There is no additional cost for this option.

Parallel Grain - The backer veneer is applied in the same direction as the face veneer. With this option, the veneer is more flexible along its length and can be more easily formed around curved projects. There is not additional cost for this option.

## Edgebanding

If your plywood or veneered panel requires a clean and solid-wood look, you'll find that veneer edgebanding is an easy solution. Edgebanding is real wood veneer that is pre-sanded and it is now available in several sizes. The 7/8" edgebanding is ideal for 3/4" thick plywood or veneered panels because it allows a bit of overhang and makes it easy to trim flush with an edge-trimming tool. \* Uses a brown adhesive that better hides the glue line in the finished panel.
