¹ For flat panels up to 1" thick. It assumes a 3/4" bottom platen board is used and that breather mesh is placed over the veneer.

² The required vacuum flow for flat panel work.

³ This refers to the edge seams. All vacuum bags have an RF welded end seam.

⁴ VS Elite™ and VS Extreme™ vacuum bags are infused with a non-transferring lubricant that prevents most veneering adhesives from sticking to the bag.

Please keep in mind that the bag sizes listed above are subject to availability and some sizes/styles may be out of stock from time to time.

More Information About Our Vacuum Bags

- All VeneerSupplies.com vacuum bags are made in the USA.
- Each vacuum bag includes one [bag closure](#).
- Each vacuum bag also includes our flush-mount stem.
- A [lock-on connector](#), which is included with all of our vacuum press kits, is required to attach the vacuum tube to the bag.
